GET
A
GRIP

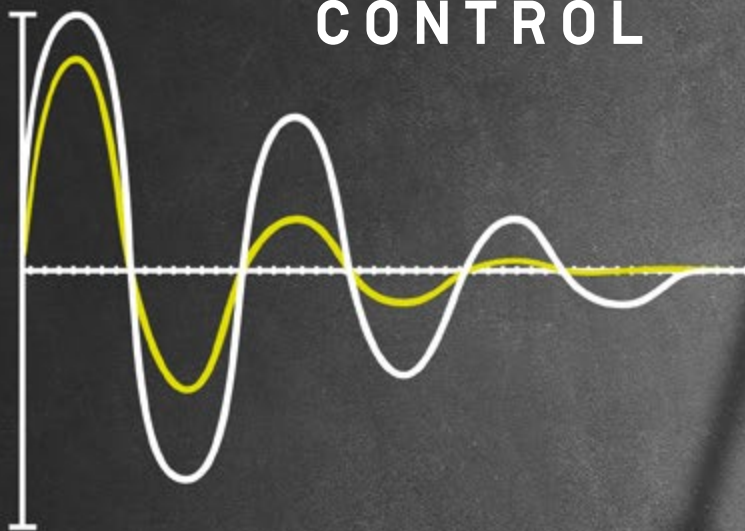

GC850

The optimized SMART GRIP in the handle enables the goaltender to have better control over the stick and therefore of its rebounds. At the same time its rubber structure maximizes the grip and dampens the peak frequencies in the handle area after every puck impact. The LITE STRUCTURAL FOAM material with its TRIPPLE FOAM CORE geometry provides additional absorption of vibrations. AIRCRAFT CARBON combines perfect stiffness with outstanding balance. The CAP TECH - a patented micro thin foil system wrapped around the shaft - increases the impact durability of the shaft.
